# 65 YEARS OF HISTORY

The goal pursued by Chiaravalli during more than 65 years of history is to become the Italian and European technological center of excellence in the field of mechanical transmission.

## OLTRE 65 ANNI DI STORIA

Il traguardo perseguito dalla Chiaravalli nei suoi oltre 65 anni di storia è quello di divenire polo tecnologico italiano ed europeo d'eccellenza nel settore della trasmissione meccanica.

# The MANUFACTURER distributor

Our Logistic Center in Cantalupa is a coordinated set of informatic functions intended for storage, picking, packaging and delivery of products.

All the functions have been automatized at the highest levels available today.

The Chiaravalli logistic group has established itself over the years becming an example of excellence for all the European companies working in the same sector.

Il nostro centro logistico è un insieme di funzioni informatiche dedicate allo stoccaggio dei prodotti, al loro prelevamento, al loro confezionamento ed alla loro spedizione.

Tutte le funzioni sono state automatizzate ai più alti livelli oggi disponibili.

La logistica Chiaravalli Group in Cavarria con Premezzo (Cantalupa) si è affermata nel tempo come elemento di comparazione e traguardo per tutte le aziende europee del settore meccanico.

WE MANUFACTURE

## COMPONENTI SPECIALI

Produzione di particolari meccanici di grande complessità ed altissima precisione

## MECHANICAL WORM SCREW JACKS

Customized and Standard products as per our catalogue

## STANDARD TRANSMISSION

Standard products as per our catalogue

WE DISTRIBUTE

## URB BEARINGS

## BELTS

## GEAR BOXES & ELECTRIC MOTORS

## INTRODUZIONE · INTRODUCTION

Ingombri ridotti, elevata affidabilità e semplicità costruttiva sono tra le caratteristiche dei nuovi riduttori epicicloidali CHIARAVALLI.

Altro grande vantaggio è l'elevata modularità di configurazione che permette di assemblare in ingresso motori elettrici, idraulici, vite senza fine (serie CHM CHIARAVALLI) oppure alberi maschio cilindrici.

Diverse configurazioni di alberi e flange in uscita permettono l'utilizzo di questi riduttori in parecchie applicazioni industriali.

Disponibili nella versione lineare (CHPL) o in quella angolare (CHPLB), i riduttori epicicloidali della serie CHIARAVALLI comprendono 11 grandezze con coppie trasmissibili che vanno da 1000 Nm a 35000 Nm e rapporti di riduzione da 3.55:1 sino a 3422:1 e oltre per riduttori con più di 4 stadi di riduzione (ordinabili a richiesta).

I riduttori CHIARAVALLI sono normalmente forniti con fondo preparatorio per la verniciatura.

*High reliability, compact volumes and easy construction are among the main characteristics of new CHIARAVALLI planetary gearboxes.*

*As one of the main advantages, our planetary gearboxes can be easily assembled with electric and hydraulic motors, worm gearboxes (CHM series) and input shafts.*

*Furthermore, they can be assembled with different output flanges or shafts, all these characteristics make them suitable for several industrial applications.*

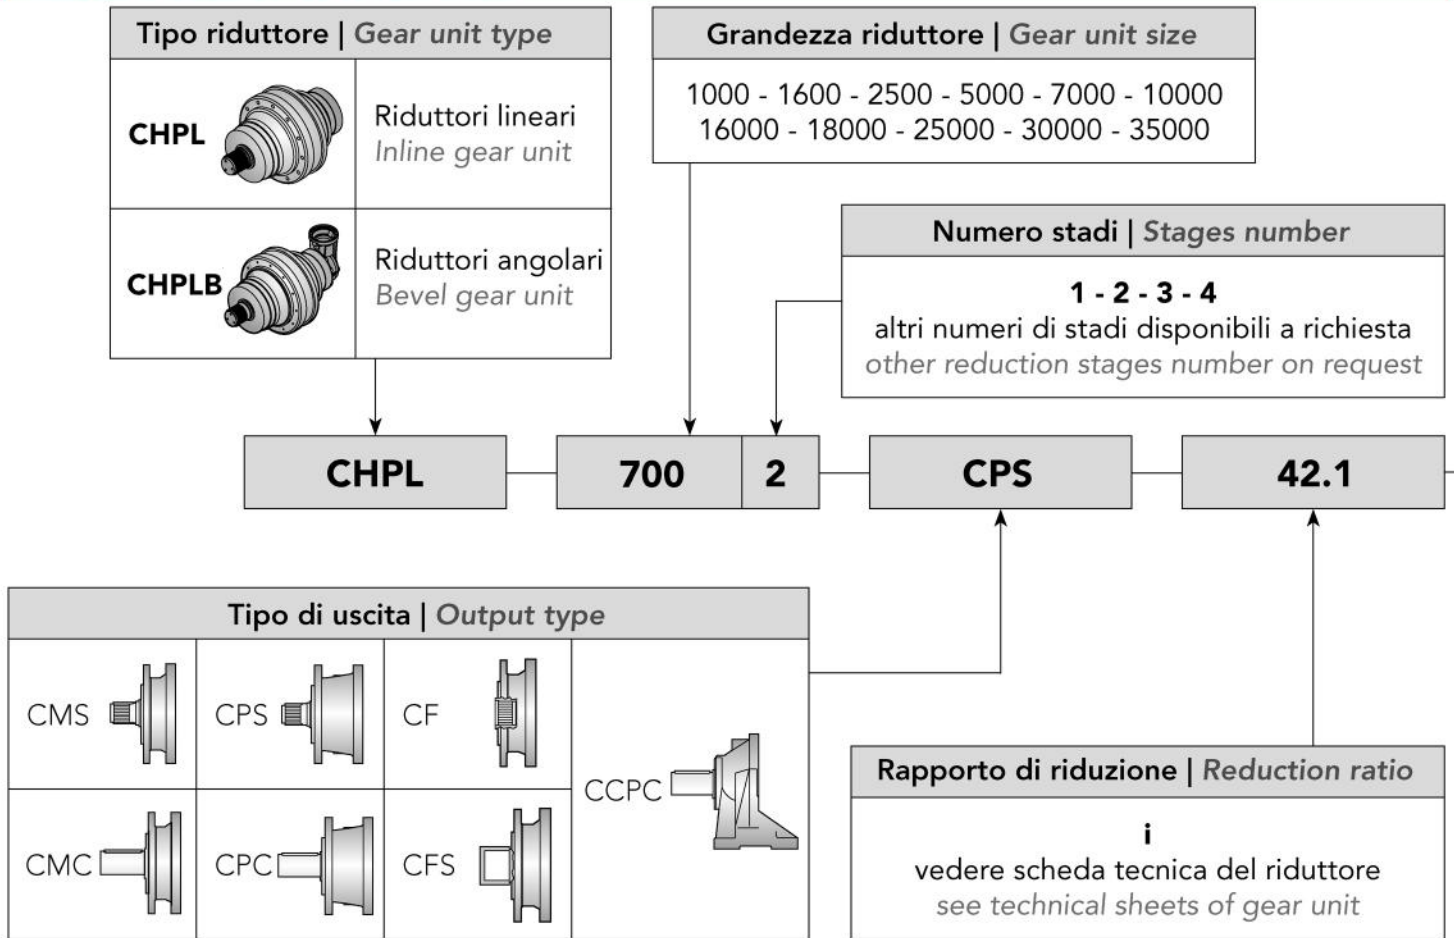

*CHIARAVALLI planetary gear boxes are available in linear version (CHPL) and angular one (CHPLB).*

*Our range covers 11 transmission sizes, from 1000 Nm up to 35000 Nm, rate reductions from 3.55:1 to 3422:1 and more with four reduction stages (these available upon request).*

*CHIARAVALLI planetary gearboxes are available at anti rusted treated blank surface ready to be painted.*

## DESIGNAZIONE · DESIGNATION

## Esempio designazione | Example of designation:

**1** CHPL 7002 CPS 42.1 IEC90 B5 CHYZ CHFF

Riduttore epicicloidale in linea **CHPL**, taglia **7000** a **2** stadi, uscita tipo **CPS** e rapporto di riduzione **i=42.1**, in ingresso predisposizione per attacco motore elettrico **IEC90**.  
Posizione di montaggio dell'intero gruppo **B5** e con accessori in uscita **CHYZ** e **CHFF**.  
*In line CHPL planetary gearbox, size 7000 with 2 stages, output flange CPS ratio i=42.1 and motor mounting flange for electrical motor IEC90.*  
*Mounting position B5 with output accessories CHYZ and CHFF.*

**2** CHPL 7002 CPS 42.1 CM42 B5 CHYZ CHFF

Riduttore epicicloidale in linea **CHPL**, taglia **7000** a **2** stadi, uscita tipo **CPS** e rapporto di riduzione **i=42.1**, in ingresso albero maschio **CM42**. Posizione di montaggio dell'intero gruppo **B5** e con accessori in uscita **CHYZ** e **CHFF**.  
*In line CHPL planetary gearbox, size 7000 with 2 stages, output flange CPS ratio i=42.1 and male shaft CM42.*  
*Mounting position B5 with output accessories CHYZ and CHFF.*

**3** CHPL 7002 CPS 42.1 H.2074.013.018 B5 CHYZ CHFF

Riduttore epicicloidale in linea **CHPL**, taglia **7000** a **2** stadi, uscita tipo **CPS** e rapporto di riduzione **i=42.1**, in ingresso predisposizione per montaggio motore idraulico cod.2074.013.018. SAUER-DANFOSS. Posizione di montaggio dell'intero gruppo **B5** e con accessori in uscita **CHYZ** e **CHFF**.  
*In line CHPL planetary gearbox, size 7000 with 2 stages, output flange CPS ratio i=42.1 and motor mounting flange for hydraulic motor code 2074.013.018 SAUER DANFOS. Mounting position B5 with output accessories CHYZ and CHFF.*

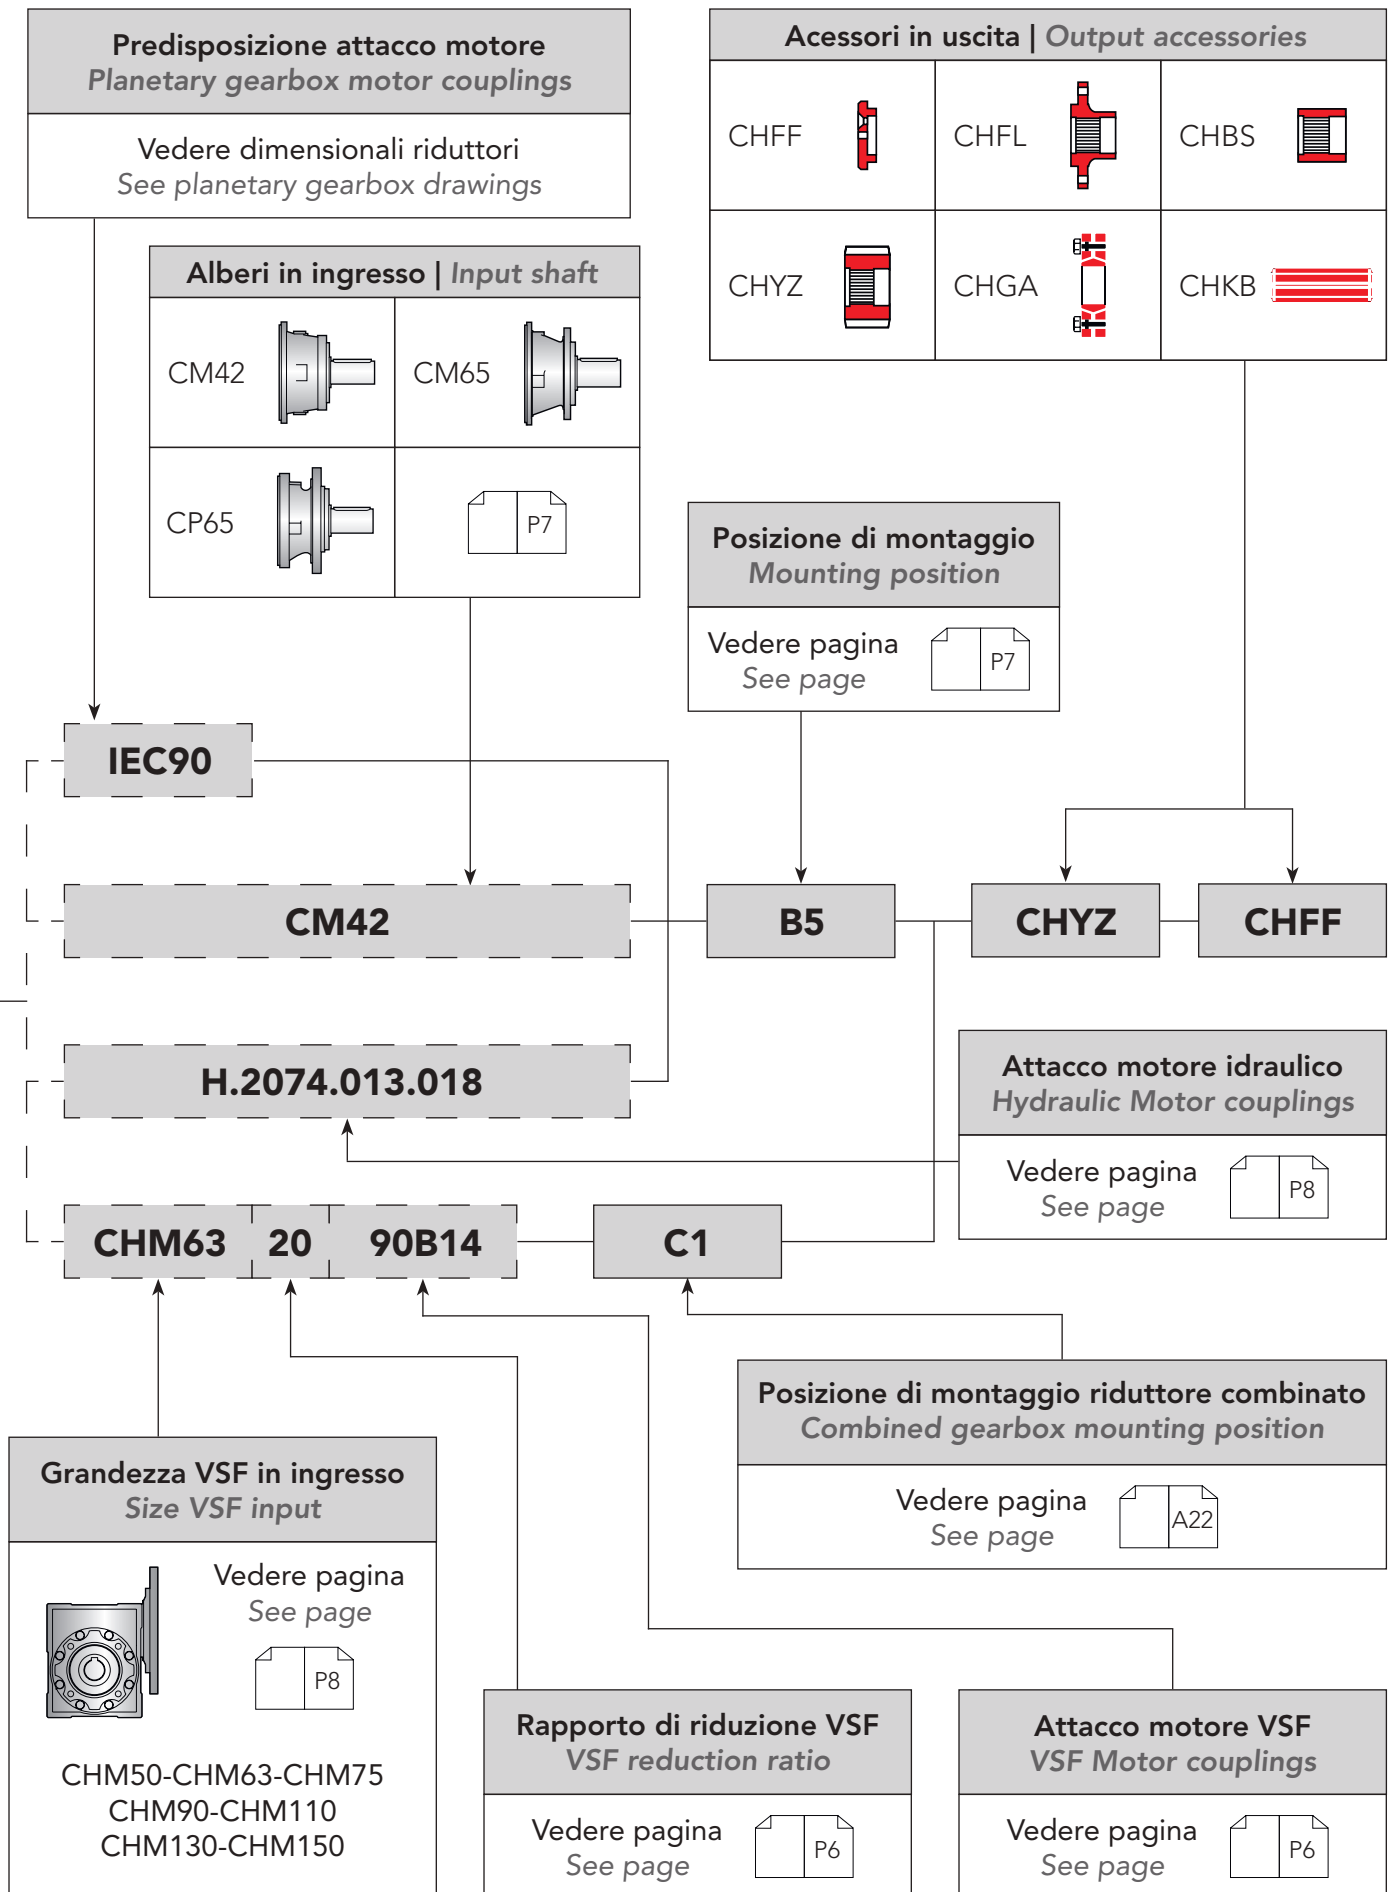

**4** CHPL 7002 CPS 42.1 CHM63 20 90B14 C1 CHYZ CHFF

Riduttore epicicloidale in linea **CHPL**, taglia **7000** a **2** stadi, uscita tipo **CPS** e rapporto di riduzione **i=42.1**, in ingresso riduttore **VSF CHM63** con **iVSF=20** e flangia motore **90B14**. Posizione di montaggio dell'intero gruppo **C1** e con accessori in uscita **CHYZ** e **CHFF**.  
*In line CHPL planetary gearbox, size 7000 at 2 stages, output flange CPS ratio i=42.1, input reducer VSF CHM63 iVSF=20 and motor mounting flange 90B14.*  
*Mounting position C1 with output accessories CHYZ and CHFF.*

## DESIGNAZIONE · DESIGNATION

## CARATTERISTICHE TECNICHE · TECHNICAL FEATURES

Al fine di utilizzare al meglio il presente catalogo come strumento professionale, vengono di seguito riportate le definizioni dei parametri caratteristici che saranno utilizzati:

**Rapporto di trasmissione****i**

Indica il rapporto tra la velocità di rotazione in ingresso  $n_1$  e la velocità di rotazione  $n_2$  ottenuta in uscita dal gruppo riduttore.

**Velocità massima in entrata** **$n_{1max}$  [rpm]**

Indica la massima velocità di rotazione consentita in ingresso al riduttore, considerando il funzionamento intermittente e non continuo del gruppo.

Per applicazioni ove richiesto un funzionamento continuo del riduttore si prega di contattare il Servizio Tecnico CHIARAVALLI.

**Coppia nominale in uscita** **$T_{2n}$  [Nm]**

Indica la coppia trasmessa dal riduttore calcolata secondo i limiti della norma internazionale ISO 6336 in condizioni di  $F_s=1$ .

**Potenza nominale in ingresso** **$P_{1n}$  [kW]**

Indica la potenza meccanica installabile sul riduttore secondo i limiti della norma internazionale ISO 6336. Valori riferiti a 1400 rpm  $F_s=1$ .

**Rendimento** **$\mu$  [%]**

Indica il rendimento del riduttore tenendo conto delle perdite energetiche che si hanno durante il suo funzionamento. Mediamente il rendimento dei riduttori epicicloidali lineari (CHPL) è dello 0.97 - 0.98 % per stadio di riduzione; è leggermente inferiore nel caso di stadi di riduzione angolari (CHPLB).

Questo valore viene influenzato anche da altri fattori come l'alta velocità, la coppia, il rapporto di riduzione e la lubrificazione

Here we are going to describe the characteristics and information necessary in order to use this catalogue in the most suitable way for any kind of final usage of our gear units in any market or professional fields:

**Reduction ratio****i**

Provide the ratio between input rotation speed  $n_1$  and the output one  $n_2$  in our planetary gearboxes.

**Maximum input speed** **$n_{1max}$  [rpm]**

This indicates the maximum input speed rotation allowed, considering a non-continuous use.

Please contact CHIARAVALLI Technical dept. in case of continuous duty.

**Nominal output torque** **$T_{2n}$  [Nm]**

This indicates the output torque values calculated according international ISO 6336 in  $F_s=1$  conditions

**Input nominal power** **$P_{1n}$  [kW]**

This indicates the mechanical power assembling on our planetary gear boxes according international ISO 6336. Ref. values to 1400 rpm  $F_s=1$

**Efficiency** **$\mu$  [%]**

Give the value of the reducer efficiency considering the energy losses due to its normal usage. CHPL efficiency of our planetary gearboxes is about 0.97 - 0.98% for every reduction stage, while on CHPLB is a little less.

Note these values may be influenced by several factors as high speed, the torque, the ratio and the lubrication.

## CARATTERISTICHE TECNICHE · TECHNICAL FEATURES

### Coppia Massima $T_2$ max [Nm]

È il valore massimo di coppia che il riduttore può trasmettere per breve tempo senza che si verifichino danneggiamenti ai suoi componenti interni ed alla sua struttura. Tale valore deve essere considerato come una coppia massima dovuta a picchi o spunti di avviamento e mai come coppia di lavoro; il valore  $T_2$ max deve inoltre essere opportunamente valutato in quegli azionamenti che comportano un elevato numero di avviamenti o inversioni. Il valore  $T_2$ max è indicato nelle schede tecniche di prodotto.

### Temperatura di funzionamento

#### t [°C]

La temperatura dell'olio deve essere compresa tra -15° e +90°C.

Per temperature di funzionamento al di fuori di questo intervallo si consigliano tenute in materiali specifici e oli adeguati fornibili su richiesta.

Contattare il Servizio Tecnico CHIARAVALLI.

### Potenza termica

#### P<sub>t</sub> [kW]

Indica la massima potenza dissipabile termicamente dal riduttore affinché la temperatura dell'olio e delle sue tenute rimanga entro i limiti consentiti.

Tale potenza si intende come dissipabile per convezione naturale dal corpo del riduttore stesso nell'ambiente in cui esso lavora e con lubrificazione interna a sbattimento.

I valori definiti per le potenze termiche, vengono considerati in condizioni di:

- Temperatura massima olio 90°C
- Olio ISO VG 150
- Temperatura ambiente 20°C.
- Posizione di montaggio orizzontale
- Servizio continuo
- n<sub>1</sub>=1400 rpm

Per via della loro geometria i riduttori con uscita CCPC (uscita con piedi, fino alla taglia 16000), possono sopportare un incremento della potenza termica dal 10 al 15%.

Nel caso in cui la potenza installata superi quella termica sarà necessario l'utilizzo di un sistema di raffreddamento ausiliario in grado di dissipare la potenza termica in eccesso. Contattare il Servizio Tecnico CHIARAVALLI.

### Materiali

Cassa Ghisa sferoidale  
Ingranaggi 21NiCrMo2 temprati e cementati Trattamento 58/60 HRC

### Maximum Torque $T_2$ max [Nm]

This is the maximum output torque that the drive can transmit over a brief time interval without damaging its internal components and structure. This value must be considered as the maximum output torque or wing to working or start-up peaks and never as the continuous working torque.  $T_2$ max must also be carefully evaluated in those applications with a high number of start-ups or reversals.

The  $T_2$ max value is shown on the single product Technical cards.

### Usage temperature

#### t [°C]

Oil temperature must be among -15° and +90°C.

For any different temperature usage, we warmly recommend particular/specific oil seals and oils available under request.

Please contact CHIARAVALLI Technical dept. for any info you might need.

### Thermal power rating

#### P<sub>t</sub> [kW]

Indication of the maximum power that can be dissipated by the gearbox keeping oil and oil seals under the allowed limits.

This power can be dissipated for natural convection from the housing gearbox to the ambience with normal turbulence lubrication.

The values here described of thermic power must be considered according:

- Oil max temperature 90°C
- Oil ISO VG 150
- Outside temperature 20°C
- Horizontal mounting position
- Continuous duty
- n<sub>1</sub>=1400 rpm

Due to their geometry CCPC reducers (foot mounted up to size 16000) allow a thermal power increase of about 10 to 15%.

In case the installed power overcomes the thermal one, an external cooled system is necessary in order to dissipate the extra heat. Please contact CHIARAVALLI Technical dept. for any info you might need.

### Materials

Spheroidal Cast Iron  
Gears 21NiCrMo2 case hardened and tempered Hardness 58/60 HRC

## CARATTERISTICHE TECNICHE · TECHNICAL FEATURES

## Fattore di servizio

## Fs

Indica il coefficiente di moltiplicazione della coppia o potenza in funzione delle condizioni di lavoro (carichi, avviamenti, ore di funzionamento, tipologia di motorizzazione e tipologia di applicazione).

Il fattore di servizio  $F_s$  può considerarsi influenzato principalmente da tre fattori:

- tipo di carico: U - M - H
- ore di lavoro giornaliere: h/day
- frequenza oraria avviamenti: na/h

## Service factor

## Fs

This is a multiplication coefficient that indicates how much the torque and the power may be increased according any different working conditions.

Service Factor  $F_s$  may be influence by mainly 3 factors:

- type of load: U - M - H
- daily working hours: h/day
- hour frequency starter: na/h

**U:** Trasportatori a nastro per pesi leggeri  
Pompe centrifughe  
Elevatori  
Imbottigliatrici

**U:** Conveyor belts for light weights  
Centrifugal pumps  
Lifts  
Bottling machines

**M:** Trasportatori per materiali pesanti  
Macchine imballaggio  
Pompe a ingranaggi

**M:** Conveyor belts for heavy weights  
Packing machines  
Gear pumps

**H:** Mescolatori  
Elevatori a tazze  
Macchine utensili  
Macchine per laterizi  
Vibratori

**H:** Mixers  
Bucket elevators  
Tooling machines  
Machinery for bricks  
Vibrators

## CARATTERISTICHE TECNICHE · TECHNICAL FEATURES

### Scelta del riduttore

Il riduttore di velocità opera tra la parte motore, adibita alla generazione della coppia motrice, e la parte macchina che genera coppia resistente sul riduttore.

Per selezionare correttamente il riduttore occorrerà conoscere tipologie e caratteristiche del motore installato, potenza erogata, coppia erogata e velocità di funzionamento.

Per quanto concerne il lato macchina, occorrerà conoscere la tipologia di servizio, potenza/coppia assorbita, velocità di rotazione e ciclo di lavoro.

Con tali informazioni si vanno a definire:

- Coppia di lavoro  $T$  [Nm]
- Potenza installata  $P$  [kW]
- Rapporto di trasmissione  $i$
- Carichi sull'albero in uscita e in entrata al riduttore  $F_r$ ;  $F_a$  [N]

In seguito si andranno a verificare i parametri che caratterizzano il riduttore.

- Coppia di lavoro, tenendo conto del fattore di servizio  $F_s$   $T \cdot F_s \leq T_{2n}$
- Potenza installata, tenendo conto del fattore di servizio  $F_s$   $P \cdot F_s \leq P_{1n}$
- Velocità in ingresso al riduttore  $n_1 < n_{1max}$
- Potenza da trasmettere  $< P_t$   
(se in servizio continuo)
- Carichi sull'albero in uscita e in entrata al riduttore  $F_r$ ;  $F_a$  [N]
- Condizioni di lubrificazione e temperatura ambiente

### Planetary gearboxes selection

The unit works between the input motor part, that creates the torque, and the final equipment.

To select the more suitable gearbox in any final usage, it is necessary to have the type and the characteristics of the mounted motor, the power, the torque and the working speed.

Concerning the driven machine it is necessary to know the type of operation, power and torque requested, speed and duty.

According with these informations we define together:

- Working torque  $T$  [Nm]
- Mounted power  $P$  [kW]
- Ratio  $i$
- Radial and axial loads on input and output shafts  $F_r$ ;  $F_a$  [N]

Consequently the gearbox parameters will be defined

- Working torque considering  $F_s$  where  $T \cdot F_s \leq T_{2n}$
- Mounted power considering  $F_s$  where  $P \cdot F_s \leq P_{1n}$
- Input speed  $n_1 < n_{1max}$
- Requested Power  $< P_t$   
(for continuous duty)
- Radial and axial loads on input and output shafts  $F_r$ ;  $F_a$  [N]
- Lubrication and room temperature

## INSTALLAZIONE E MANUTENZIONE · INSTALLATION AND MAINTENANCE

### Installazione e manutenzione

Per ottenere le migliori prestazioni dal riduttore, si consiglia di provvedere ad un adeguato rodaggio dello stesso incrementando la potenza gradualmente nelle prime ore di funzionamento.

In questa fase un aumento delle temperature è da considerarsi nella norma. In caso di funzionamento difettoso, rumorosità, perdite olio etc. arrestare immediatamente il riduttore e, dove possibile, rimuovere la causa e contattare il Servizio Tecnico CHIARAVALLI.

Prima e durante l'installazione effettuare i seguenti controlli:

- I dati riportati sulla targhetta identificativa devono corrispondere al riduttore ordinato.
- Il livello dell'olio dovrà corrispondere alla quantità prevista per la posizione di montaggio richiesta (vedi paragrafo "Lubrificazione").
- Il fissaggio del riduttore deve avvenire su superfici piane e sufficientemente rigide in modo da evitare qualsiasi vibrazione.
- Il riduttore e l'asse della macchina da movimentare devono essere in perfetto allineamento.
- In caso si prevedano urti, sovraccarichi o blocchi della macchina il cliente dovrà provvedere all'installazione di limitatori, giunti, salvamotori etc.
- Gli accoppiamenti con pignoni, giunti, pulegge ed altri organi devono essere fatti previa pulizia delle parti ed evitando urti nel montaggio poiché questo potrebbe danneggiare i cuscinetti ed altre parti interne.
- Nel caso il motore sia di fornitura del cliente questi dovrà accertarsi che le tolleranze di flangia ed albero corrispondano ad una classe "normale", i nostri motori rispondono a questa esigenza.
- Verificare che le viti di fissaggio del riduttore e dei relativi accessori siano correttamente serrate.
- Adottare gli opportuni accorgimenti per proteggere i gruppi da eventuali agenti atmosferici aggressivi.
- Dove previsto proteggere le parti rotanti da possibili contatti con gli operatori.
- Nel caso i riduttori vengano verniciati proteggere gli anelli di tenuta ed i piani lavorati.

Nel caso di applicazioni in cui sia richiesto l'utilizzo di motori con massa superiore ai 100 kg, si consiglia di contattare il Servizio Tecnico CHIARAVALLI.

Nel caso di lunga conservazione a magazzino, superiore ai tre mesi, si consiglia di proteggere alberi e piani lavorati con antiossidanti e di ingrassare gli anelli di tenuta.

### Run-in and maintenance

*In order to achieve the best gearbox performances, during the run-in, we warmly recommend to increase the power step by step and strictly control the temperature.*

*During this period an increase of temperature must be considered normal.*

*In any case of defected drive, noise, oil losses please immediately stop the gear box unit, if possible remove the problem and contact CHIARAVALLI Technical department.*

Before and during the first run-in please check:

- The data shown on the identification nameplate must correspond to the gearbox ordered.
- The oil level depends on the mounting position requested (see section LUBRICATION).
- The gearbox must be on a flat surface that is sufficiently rigid in order to avoid any vibration.
- The gearbox and the axis of the machine to be driven must be perfectly aligned.
- In the event that knocks, overloading or blockage of the machine are foreseen, the customer must install a limit device, couplings overload cut-out etc.
- Coupling with pinions, joints, pulleys and other parts must be done after the parts have been cleaned and knocks should be avoided while assembling as they could damage the bearings and other internal parts.
- In the event that the motor is supplied by the customer, he must check that the flange and shaft tolerances correspond to a "normal" class; our motors satisfy this requirement.
- Verify that the fixing screws for the gear and the related accessories are correctly tightened.
- Take suitable measures to protect the groups from any aggressive atmospheric agents.
- Where foreseen, protect rotating parts from any possible contact with the operators.
- If the gearboxes are painted, protect the oil seals and the machined surface.

As the application requires the assembling of a motor over 100 kg, we suggest to contact CHIARAVALLI Technical department for further information.

In case of long storage in warehouse, for example more than 3 months, please protect the shafts and the machined surfaces using antioxidants and grease the oil seals.

## INSTALLAZIONE E MANUTENZIONE · INSTALLATION AND MAINTENANCE

### Gruppi con fissaggio a flangia/piedi

#### Uscite maschio tipo CMS - CMC - CPS - CPC

E' necessario utilizzare sempre tutti i centraggi previsti sugli alberi scanalati, specie per applicazioni in cui sono adottati pignoni dentati.

Per le uscite maschio si consiglia di adottare entrambi i centraggi delle flange d'attacco, nel caso in cui i carichi radiali superino del 50% i valori indicati nei relativi grafici (vedere singole schede grandezza riduttore).

Nel caso di applicazioni gravose con forti sollecitazioni sia sull'albero in ingresso che sull'albero in uscita è consigliabile contattare il Servizio Tecnico CHIARAVALLI.

#### Uscite maschio con piedi CCPC

Per le uscite con piedi è necessario controllare i piani della struttura d'appoggio in modo da creare un perfetto allineamento tra il riduttore e l'albero da movimentare. In caso di difficoltà si consiglia di effettuare il collegamento tramite un giunto elastico. Una volta installato il riduttore verificare che non ci siano vibrazioni anomale.

#### Uscite femmina tipo CF

Per le uscite femmina scanalate è necessario verificare in modo accurato la coassialità/ortogonalità con l'albero di trasmissione. Per via della loro struttura queste tipologie di uscite non sono adatte a sopportare carichi radiali.

#### Uscite con calettatore a montaggio pendolare CFS

Tale uscita necessita l'adozione di un opportuno calettatore (fornibile su richiesta) per collegare l'albero cavo del riduttore all'albero maschio della macchina. Per tale accoppiamento sgrassare accuratamente le superfici interessate, procedere all'avvitamento delle viti del calettatore in modo graduale e una alla volta. E' importante verificare che l'albero maschio da calettare rispetti le dimensioni e le tolleranze riportate nelle relative pagine dimensionali.

Per l'installazione dell'uscita CFS è possibile utilizzare il braccio di reazione come indicato nelle relative schede tecniche; si consiglia l'utilizzo di bracci di reazione con elementi antivibranti.

Nel caso di applicazioni in cui sia richiesto l'utilizzo di motorizzazioni particolarmente pesanti o si utilizzino cinghie sul lato entrata, si consiglia di contattare il Servizio Tecnico CHIARAVALLI.

### Unit with flange/feet clamping

#### Male output CMS - CMC - CPS - CPC

When tooth pinions are mounted, the spigots on the splined output shafts must be used.

For these kind of units, when the radial loads are 50% higher than values indicate in the tables (please check tables in the following pages), we warmly suggest to use both spigots of the flanges.

In case of heavy applications, contact CHIARAVALLI Technical department for further information.

#### Male output with feet CCPC

For these gearboxes please check the properly aligned between the gear unit and the operating shaft, use a flexible coupling in case of difficulties, finally please check the vibrations.

#### Female output CF

Carefully check the gearbox concentricity and perpendicularity, this must be in line with the axis of the driven shaft. Due to this characteristic CF type is not suitable for radial load.

#### Shaft mounted output with locking element type CFS

For this type it is necessary to use a suitable locking element (available on request) to connect the gearbox hollow shaft with the operating shaft. In this case properly degrease the internal surface, then proceed tightening the locking screws in a gradual, uniform and continuous sequence one by one. Check the tolerances and the dimensions provided on each drawing of the operating shaft.

CFS output can be mounted with a torque arm as indicate on the technical tables, we suggest using torque arms with antivibration rubber elements.

In case of heavy applications or with belts on the input side, please contact CHIARAVALLI Technical department for further information.

## LUBRIFICAZIONE · LUBRICATION

La lubrificazione degli organi interni è indispensabile per garantire il buon funzionamento e la corretta durata del riduttore CHIARAVALLI.

Si consiglia pertanto di effettuare le seguenti verifiche:

- **POSIZIONE ORIZZONTALE:**  
indipendentemente dalla versione lineare o angolare è importante verificare che l'olio raggiunga la mezzeria del riduttore.
- **POSIZIONE VERTICALE:**  
in questa posizione è molto importante verificare che il cuscinetto e l'anello di tenuta che si trovano nel punto superiore del gruppo siano costantemente a contatto con l'olio.  
E' consigliato installare il vaso di espansione (fornibile su richiesta) in modo da prevenire eventuali espansioni dell'olio con l'aumentare della temperatura. In caso di impossibilità di installazione del vaso consigliamo l'utilizzo di appositi raccordi e prolunghe in modo da garantire il corretto livello dell'olio (verificare sempre l'assenza di bolle d'aria in fase di riempimento d'olio).

Accertarsi che il riduttore abbia i tappi montati nei punti coerenti alla relativa posizione di montaggio come successivamente indicato.

Durante il funzionamento la superficie esterna del riduttore deve restare sotto i 90°C.

In caso di applicazioni con elevate temperature contattare il Servizio Tecnico CHIARAVALLI.

**Cambio olio**

Si consiglia di effettuare il primo cambio dell'olio dopo 100 h di funzionamento.

Per quelli successivi considerare circa 2000 h di utilizzo o comunque almeno una volta all'anno.

Durante la vita del riduttore, controllare visivamente che non vi siano perdite o trafiletti di olio.

Se l'olio scende al di sotto del livello minimo, effettuare un rabbocco con il medesimo olio precedentemente utilizzato.

E' importante non mischiare lubrificanti con caratteristiche differenti.

E' opportuno eseguire il cambio dell'olio quando il riduttore è ancora caldo in modo da evitare possibili depositi e sedimenti solidi all'interno del corpo del riduttore stesso. Si consiglia inoltre, una volta svuotato il riduttore dall'olio esausto, di effettuare un lavaggio dell'interno con un apposito detergente indicato dal fornitore del lubrificante che si andrà ad adottare.

*In order to make the CHIARAVALLI planetary gearboxes run efficiently we recommend a correct lubrication following these simple suggestions:*

- **HORIZONTAL POSITION:**  
*no matter if linear or angular version, the oil must reach the half of the gearbox.*
- **VERTICAL POSITION:**  
*In this position the bearings and the oil seals must be continuously in contact with oil.  
We suggest to use an expansion tank (available on request) to avoid any oil spread at the increase of temperature.  
In some cases the assembling of the tank is not allowed, so we suggest to use suitable extensions and pipes to guarantee the correct oil level (please check any possible air bubble while filling the oil).*

*Check the correct position of the plugs according the assembling position as we indicate beyond.*

*Maximum external surface gearbox temperature must be under 90°C.*

*Please contact CHIARAVALLI Technical department for any different case.*

**Oil changes**

*We suggest the first change after 100h of work, then please consider 2000 running hours or at least once per year.*

*During the gearbox life periodically check the oil level and possible oil leakages.*

*Please fill extra oil in case of lack or under minimum level without changing the type of oil.*

*Do never mix the type of oil.*

*To avoid sediment change the oil when the reducer is still warm, clean the internal parts using only the correct and recommend detergent after empty the reducer.*

## LUBRIFICAZIONE · LUBRICATION

### Vaso di espansione

Per i gruppi montati in posizione verticale (lineari CHPL o angolari CHPLB) e in posizione orizzontale con la coppia conica rivolta verso l'alto, si consiglia l'utilizzo del vaso di espansione. Il vaso va posizionato al di sopra del punto più alto del riduttore ed ha il compito di contenere eventuali espansioni dell'olio all'aumentare della temperatura e garantire un rabbocco sicuro. Tale accessorio può essere fornito su richiesta.

Riduttore assiale verticale con ingresso inferiore.  
Axial gearbox vertical position with lower input.

### Expansion tank

Use the expansion tank for the CHPL and CHPLB groups mounting in vertical position and in horizontal position when the bevel gear is upside assembled. Put the tank on the gearbox higher point to control any oil spread due to temperature increasing and fill the reducer properly. This item is available on request.

Riduttore assiale verticale con ingresso superiore.  
Axial gearbox vertical position with upper input.

Riduttore angolare orizzontale con ingresso superiore.  
Bevel gearbox horizontal position with upper input.

 Tappo di carico/sfiato olio  
Oil filling/vent plug

 Tappo di livello olio  
Oil level plug

 Tappo di scarico olio  
(magnetico)  
Oil drain plug  
(magnetic)

## LUBRIFICAZIONE · LUBRICATION

## Smaltimento olio esausto

In fase di smaltimento degli oli esausti, è obbligatorio usare tutte le cautele per non inquinare suolo, aria e acqua. L'olio esausto, non deve essere inquinato da altre sostanze estranee e deve obbligatoriamente essere smaltito in appositi centri autorizzati, il tutto nel rispetto delle normative vigenti.

## Lubrificante

CHIARAVALLI consiglia l'uso di oli per ingranaggi con additivi EP (elevate pressioni) ed antischiuma. Per applicazioni ad elevate temperature, si consiglia l'utilizzo di oli sintetici a base polialfaolefina (PAO) o a base poliglicole (PG). Nella tabella successiva suggeriamo alcuni oli idonei alla lubrificazione in funzione della temperatura d'utilizzo.

## Exhausted oil disposing

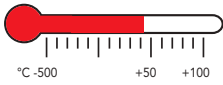

According to the local environmental protection laws and regulations adopt precaution necessary to avoid to pollute ground, air and water.

The exhausted oil must be not contaminated by any other substance and should be sent to specialised companies for recycling when possible.

## Lubricant

CHIARAVALLI technical dept. suggests the use of EP oil with additives and antifoam. In case of high temperature please use PAO synthetic or PG oils.

In the following table check some useful oils according to the working temperature.

|                  | Temperatura ambiente / Ambient temperature [°C] |                   |                   |   |                       |                       |   |                |                 |
|---|---|-------------------|-------------------|---|-----------------------|-----------------------|---|----------------|-----------------|
|   | Olio minerale<br>Mineral Oil                    |                   |                   | Olio sintetico Polialfaolefina (PAO)<br>Poly-alpha-Olefin Synthetic Oil (PAO) |                       |                       | Olio sintetico Poliglicoli (PG)<br>Poly-glycol Synthetic Oil (PG) |                |                 |
|   | -10 ÷ +30+                                      | 10 ÷ +45+         | 30 ÷ +60-         | 20 ÷ +60-   |                       |                       | 20 ÷ +60  |                |                 |

| <br><b>SHELL</b> | Omala S2G 150                                   | Omala S2G 220     | Omala S2G 320     | Omala S4GX 150  | Omala S4GX 220        | Omala S4GX 320        | Omala S4WE 150  | Omala S4WE 220 | Omala S4WE 320  |

La viscosità aumenta al diminuire della temperatura (diventa più denso) e diminuisce all'aumentare delle temperatura (diventa più fluido).  
The viscosity of the lubricant decrease as the temperature rises and increase as the temperature drops.

## LUBRIFICAZIONE · LUBRICATION

### Quantità lubrificante

I quantitativi di olio di seguito riportati sono indicativi e soggetti a variazioni in funzione della configurazione del riduttore. Indipendentemente dai quantitativi di seguito riportati, controllare sempre visivamente che l'olio raggiunga il livello corretto come precedentemente indicato.

### Lubricant quantity

The data in the table here below are indicative and may change according the gearbox mounting position.

Please always check the oil level following the previous suggestions.

## CHPL riduttori assiali | axial gearboxes 1000 ÷ 10000

|      |       | Tipo di uscita / Output type  |   |   |   |   |   |  |   |   |   |

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

- 1** Uscita / Output: CMS, CMC
- 2** Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

- 1** Uscita / Output: CMS, CMC
- 2** Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

- 1** Uscita / Output: CMS, CMC
- 2** Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali Fr (N) applicabili sull'albero uscita in funzione della distanza di applicazione L rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads Fr (N) on the output shaft with reference to the distance L.

- 1 Uscita / Output: CMS, CMC
- 2 Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali Fa (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads Fa (N) on the output shaft with reference to the load direction and the output type.

|        | 1     | 2     |   |

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

1 Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $Fr$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $Fr$  (N) on the output shaft with reference to the distance  $L$ .

**1** Uscita / Output: CMS, CMC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $Fa$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $Fa$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali Fr (N) applicabili sull'albero uscita in funzione della distanza di applicazione L rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads Fr (N) on the output shaft with reference to the distance L.

CHPL / CHPLB 16000

- 2** Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali Fa (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads Fa (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

- 2** Uscita / Output: CPS, CPC, CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $F_r$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $F_r$  (N) on the output shaft with reference to the distance  $L$ .

- 1 Uscita / Output: CMS, CMC
- 2 Uscita / Output: CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $F_a$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $F_a$  (N) on the output shaft with reference to the load direction and the output type.

## CARICHI RADIALI (Fr) · RADIAL LOADS (Fr)

Nel diagramma seguente, sono indicati i carichi radiali  $Fr$  (N) applicabili sull'albero uscita in funzione della distanza di applicazione  $L$  rispetto alla battuta dell'albero.

The hereunder table shows the allowable radial loads  $Fr$  (N) on the output shaft with reference to the distance  $L$ .

- 1 Uscita / Output: CMS, CMC
- 2 Uscita / Output: CCPC

## CARICHI ASSIALI (Fa) · AXIAL LOADS (Fa)

Nella tabella seguente sono indicati i carichi assiali  $Fa$  (N) applicabili sull'albero di uscita in funzione della direzione di applicazione del carico e della versione.

The hereunder table shows the allowable axial loads  $Fa$  (N) on the output shaft with reference to the load direction and the output type.

## MOTORI ELETTRICI · ELECTRIC MOTORS

CHIARAVALLI può fornire ai suoi clienti differenti motorizzazioni elettriche installabili sui riduttori epicicloidali lineari/angolari o sui combinati vite senza fine.

Tutti i nostri motori sono forniti con grado di protezione IP55, classe di isolamento F e separatore di fase per l'utilizzo sotto inverter, in questo caso possono essere forniti completi di servoventilazione.

CHIARAVALLI Group S.p.A. can supply different electric motorizations to its customers which can be mounted on the planetary, linear/ angular gearboxes or on double worm gearboxes. All our motors are supplied with level of protection IP55 insulation class F and phase separator to be used under frequency variator and in this case can be supplied complete with forced ventilation.

### Principali caratteristiche motori elettrici Chiaravalli

- Motori con rotore a gabbia, chiusi con ventilazione superficiale esterna.
- Progetto, costruzione e collaudo in conformità alle norme CEI2-3, norme internazionali IEC 34-1 ed alle principali norme straniere.
- Potenze-dimensioni secondo le norme IEC 72, norme nazionali UNEL-MEC.
- Classe isolamento F.
- Protezione IP55.
- Servizio continuo S1.
- Direttiva Europea ROHS 2002/95/CE.
- Separatori di fase.
- A richiesta motori da 160 a 355.
- Volt 400/690 standard da 160 a 355 a richiesta sugli altri.

### Main characteristics Chiaravalli electric motors

- Motors with cage rotor, closed with external surface ventilation/ fan cooled ventilation
- Project, manufacturing and testing in accordance with CEI2-3 regulations, IEC 34-1 international regulation and with main foreign regulation.
- Power and dimensions in accordance with IEC 72 and national UNEL-MEC regulations.
- Insulation class F
- Protection IP55
- S1 continuous service
- ROHS 2002/95/CE European Directive
- Phase separators
- Motors from 160 to 355
- Voltage 400/690 standard on motors from 160 to 355 on demand for the others

## MOTORI ELETTRICI · ELECTRIC MOTORS

## Funzionamento a 60 Hz

I motori CHIARAVALLI possono funzionare con frequenza a 60 Hz con differenze di prestazione e grandezze elettriche applicando i coefficienti moltiplicativi indicati nella tabella.

## Operation at 60 Hz

CHIARAVALLI motors can work at 60 Hz frequency with different performances and electrical size as described on the following chart.

| Coefficienti di conversione per funzionamento da 50 Hz a 60 Hz / Conversion coefficient for function from 50 Hz to 60 Hz |                                  |                        |                       |                        |            |                       |                        |                          |

## Tensione di alimentazione

I motori CHIARAVALLI sono progettati per essere utilizzati sulla rete Europea 230/400 Volt +/- 10% - 50 Hz e 400/690 +/- 10% - 50 Hz.

Questo significa che lo stesso motore può funzionare sulle seguenti reti ancora esistenti:

- 220/380 Volt +/- 5%
- 230/400 Volt +/- 10%
- 240/415 Volt +/- 5%
- 380/660 Volt +/- 5%
- 400/690 Volt +/- 10%
- 415/720 Volt +/- 5%

rispondendo ai requisiti richiesti dalle normative di numerosi paesi.

## Power voltage

CHIARAVALLI motors are configured to be used all over the European net system 230/440 Volt +/-10% -50Hz and 400/690 +/-10%-50Hz

This means that the same motor can be used on the following existing network:

- 220/380 Volt +/- 5%
- 230/400 Volt +/- 10%
- 240/415 Volt +/- 5%
- 380/660 Volt +/- 5%
- 400/690 Volt +/- 10%
- 415/720 Volt +/- 5%

answering to the required standard conditions in many countries.

## MOTORI EFFICIENZA IE 3

Il 1° Gennaio 2017 è entrata in vigore la terza fase del regolamento (CE) n° 640/2009 pertanto, a partire dalla suddetta data, i motori commercializzati nello Spazio Economico Europeo a 2, 4 e 6 poli con potenza compresa tra 0,75 Kw e 375 Kw dovranno avere efficienza minima IE3, in alternativa IE2, se alimentati da convertitore di frequenza (inverter) oppure destinati a paesi non appartenenti al suddetto mercato.

Con l'entrata in vigore della terza fase sarà responsabilità dell'acquirente assicurarsi che i motori IE2, rientranti nella normativa, siano utilizzati come sopra indicato.

- \* A richiesta motori da 160 a 355
- \* Volt 400/690 standard da 160 a 355 a richiesta sugli altri
- \* A richiesta è fornibile motore marca **SIEMENS**
- \* A richiesta è fornibile motore autofrenante marca **MGM**

## IE 3 EFFICIENCY MOTORS

From January 2017, the third phase of the regulation (CE) n° 640/2009 came into force, therefore, starting from this date, the electric motors sold in the European Economic Market at 2, 4 and 6 poles with power included between KW 0,75 and KW 375 Kw must have minimum efficiency IE3, alternatively IE2, if supplied with inverter or destined for countries not belonging to the aforementioned market.

With the entry into force of the third phase, it will be the responsibility of the purchaser to make sure that the IE2 motors, which are included in the regulations, are used as indicated above.

- \* Motors size 160 up to 355 on request
- \* Volt 400/690 standard from 160 up to 355 on request for other sizes.
- \* **SIEMENS** motor available on request
- \* **MGM** brake motor available on request

## PREDISPOSIZIONI PER RIDUTTORI A VITE SENZA FINE · WORM GEAR CONNECTIONS

CHIARAVALLI può fornire ai suoi clienti riduttori epicicloidali combinati ai vite senza fine della serie CHM CHIARAVALLI. Per la selezione del riduttore a vite senza fine contattare il servizio tecnico CHIARAVALLI.

Il vite senza fine è installabile sulla versione lineare CHPL con il duplice scopo di:

- rendere l'ingresso ortogonale rispetto all'uscita dell'epicicloidale
- aumentare il rapporto di riduzione

Di seguito riportiamo le diverse predisposizioni attacco motore per i vite senza fine:

CHIARAVALLI can supply combined planetary gearboxes with worm gear of CHM CHIARAVALLI series to its customers. In order to choose the correct gearbox with worm gear connections, please contact CHIARAVALLI technical service.

The worm gearbox connection can be installed on the linear version CHPL with the double aim of:

- Have an orthogonal input and an planetary output
- Increase the ratio

Here following the different input motor adaptor for worm gear connections:

**Kg** 26.0

M12 8.8 96.9 Nm

## PREDISPOSIZIONI PER MOTORI IDRAULICI · HYDRAULIC MOTORS CONNECTION

CHIARAVALLI può offrire ai suoi clienti le predisposizioni per i più diffusi motori idraulici.

Di seguito riportiamo gli ingressi disponibili.

Per ogni altra necessità non in tabella contattare il Servizio Tecnico CHIARAVALLI.

CHIARAVALLI can offer input motor adaptor for the most hydraulic motor.

Following the available input adaptor. For any other requirement not listed in the chart here following, please contact technical service CHIARAVALLI.

## FRENI IDRAULICI · HYDRAULIC BRAKES

I riduttori epicicloidali CHIARAVALLI possono essere dotati di freni idraulici.

Tali freni vengono adottati come **freni di stazionamento del riduttore e quindi idonei ad assolvere alla sola frenatura statica**. I freni hanno lubrificazione separata da quella del riduttore epicicloidale; prima della messa in servizio è quindi necessario provvedere al loro riempimento con idoneo olio idraulico.

Di seguito vengono riportate le caratteristiche principali dei freni idraulici disponibili:

$T_{br}$  = Coppia frenante

$p_{brMin}$  = Pressione minima di esercizio

$p_{brMax}$  = Pressione massima di esercizio

CHIARAVALLI planetary gearboxes can be equipped with hydraulic brakes.

These brakes are used as **parking brakes for the gearbox, act to discharge a statics braking only**.

Brakes have separate lubrication from the planetary gearbox; before the start up, brakes need to be fulfilled by hydraulic oil.

Main characteristic for available hydraulic brakes are following:

$T_{br}$  = Braking torque

$p_{brMin}$  = Minimum operating pressure

$p_{brMax}$  = Maximum operating pressure

| $T_{br}$<br>[Nm] | Applicabilità<br>Applicability | $p_{brMin}$<br>[bar] | $p_{brMax}$<br>[bar] |  [l] |     |  Kg | Codice / Code |

# CONDIZIONI GENERALI DI VENDITA

**1) ORDINI** - Gli ordini per materiale standard e speciale devono essere sempre riferiti alle offerte della CHIARAVALLI GROUP S.p.A. Le ordinazioni sono impegnative per il cliente. Una volta iniziata la lavorazione non si accettano annullamenti o riduzioni dell'ordine salvo il risarcimento da parte del cliente dei costi di materiale e di lavorazione sostenuti fino al momento della sospensione. La quantità spedita può variare del  $\pm$  5% rispetto alla quantità ordinata.

**2) PREZZI** - Si intendono quelli in vigore alla data dell'ordine. Tutti i prezzi sono per merce resa franco Premezzo, imballo escluso. Qualora nel corso della fornitura si verificassero aumenti nel materiale o negli altri costi di produzione è facoltà della CHIARAVALLI GROUP S.p.A. di adeguare i prezzi, anche per gli ordini in corso, agli aumenti verificatisi.

**3) TERMINI DI CONSEGNA** - Sono da considerarsi validi solo i termini di consegna indicati dalla CHIARAVALLI GROUP S.p.A. Essi sono da considerarsi comunque solo indicativi. Nei casi di difficoltà nell'approvvigionamento dei materiali, di sciopero o comunque in tutti i casi di forza maggiore, i termini di consegna vengono automaticamente prorogati senza che la CHIARAVALLI GROUP S.p.A. sia tenuta a corrispondere indennizzi di sorta. Il cliente ha in ogni caso l'obbligo del ritiro del materiale speciale ordinato all'approntamento.

**4) SPEDIZIONI** - Le spedizioni si intendono a carico del committente ed eseguite a suo rischio e pericolo. I reclami per gli eventuali ammanchi devono presentarsi entro 8 gg. dal ricevimento della merce. Qualora venga pattuito che il costo del trasporto sia a carico, anche solo in parte, della CHIARAVALLI GROUP S.p.A., questa si riserva il diritto di scegliere il mezzo di spedizione più economico.

**5) IMBALLO** - L'imballo è fatturato al prezzo di costo.

**6) RESI** - Non si accettano ritorni di merce per qualsiasi causa se non preventivamente autorizzati e con imballi, eventuale sdoganamento e resa a totale carico dell'acquirente. A copertura degli oneri di magazzino ed amministrativi sarà emessa nota di addebito in ragione del 15% del valore della merce resa.

**7) GARANZIA** - La ditta CHIARAVALLI GROUP S.p.A. si impegna a riparare o sostituire gratuitamente quei pezzi da essa riconosciuti difettosi. La merce contestata dev'essere resa alla sede della CHIARAVALLI GROUP S.p.A., franco di ogni spesa. La garanzia decade qualora i pezzi resi come difettosi siano stati riparati o manomessi. Le riparazioni di pezzi difettosi eseguite dal committente saranno riconosciute solamente dietro autorizzazione dalla CHIARAVALLI GROUP S.p.A. e dopo approvazione di essa del preventivo di spesa. La CHIARAVALLI GROUP S.p.A. non assume responsabilità nè riconosce indennizzi di sorta per danni che si verificassero durante l'impiego dei suoi prodotti anche se difettosi. Non viene riconosciuta la garanzia per perdita di lubrificante determinata da normale usura degli anelli di tenuta.

**8) RESPONSABILITÀ** - La ditta CHIARAVALLI GROUP S.p.A. non assume responsabilità nè riconosce indennizzi di sorta per danni che si verificassero durante l'impiego dei suoi prodotti anche se difettosi. La CHIARAVALLI GROUP S.p.A. declina ogni responsabilità nell'esecuzione di particolari su disegno del cliente sottostanti ad eventuali brevetti.

**9) PAGAMENTI** - Saranno riconosciuti validi solo i pagamenti effettuati nei modi e nei termini pattuiti. Trascorso il termine di pagamento la CHIARAVALLI GROUP S.p.A. conteggerà gli interessi di mora al tasso del 3% superiore a quello legale, fermo il diritto di esigere il pagamento. In caso di ritardato o mancato pagamento da parte del committente la ditta CHIARAVALLI GROUP S.p.A. si riserva il diritto di sospendere le consegne degli ordini in corso o di pretendere il pagamento anticipato senza riconoscere al committente indennizzi di sorta o risarcimenti. Qualsiasi contestazione dei materiali in corso di fabbricazione o già in possesso del committente non libera quest'ultimo dall'effettuare il pagamento alla scadenza stabilita e per l'intero ammontare della fattura senza alcuna detrazione.

**10) PROPRIETÀ** - Tutta la merce spedita rimane sempre di proprietà della Ditta CHIARAVALLI GROUP S.p.A. fino al pagamento completo delle sue fatture.

**11) FORO COMPETENTE** - Qualsiasi controversia inerente ai rapporti commerciali con la CHIARAVALLI GROUP S.p.A. sarà di competenza del Tribunale di Busto Arsizio.

**1) ORDERS** - Orders for special and standard material must always refer to offers made by CHIARAVALLI GROUP S.p.A. The orders are binding for the client. Once work has commenced no cancellations or order reductions will be accepted unless the client reimburses the costs of the material and the work carried out up to the moment in which the order was suspended. The quantity despatched can vary by  $\pm$  5% compared to the quantity ordered.

**2) PRICES** - The prices are those in force at the date of order. All prices are for goods delivered ex-works Premezzo, packing excluded. If there should be any increase in production and material costs over the duration of the supply, CHIARAVALLI GROUP S.p.A. reserves the right to adapt the prices accordingly, even for orders in course.

**3) TERMS OF DELIVERY** - Only the terms of delivery indicated by CHIARAVALLI GROUP SpA are to be considered valid. However, they must only be considered as indicative. In the event of difficulty in the procurement of materials, strikes or in any event in all cases of force majeure, the terms of delivery will be automatically extended without CHIARAVALLI GROUP S.p.A. having to pay any reimbursement for damages. The client is obligated to collect special material ordered when ready.

**4) DELIVERIES** - Deliveries are the responsibility of the purchaser and are carried out at his own risk and peril. Any claims for shortages must be presented within 8 days of receipt of the goods. If it is agreed that the cost of transport is to be paid, even if only in part, by CHIARAVALLI GROUP S.p.A., the latter reserves the right to choose the most economical means of transport.

**5) PACKING** - Packing will be invoiced at cost.

**6) RETURNS** - No returns for any reason will be accepted unless previously authorised and with packing, any customs clearance and the return paid for by the purchaser. To cover warehouse and administrative expenses a debit note will be issued for approx. 15% of the value of the goods returned.

**7) WARRANTY** - CHIARAVALLI GROUP S.p.A. promises to repair or substitute free of charge any parts that they recognise as being defective. The questioned goods must be returned to the factory of CHIARAVALLI GROUP S.p.A., free of all expenses. The warranty will be considered cancelled in the event that the parts returned as defective have been repaired or tampered with. The repair of defective parts carried out by the purchaser will only be accepted after authorisation from CHIARAVALLI GROUP S.p.A. and after their approval of the cost estimate. CHIARAVALLI GROUP S.p.A. does not accept responsibility or pay any reimbursement for damages that occur during the use of their products, even if defective. Warranty is excluded for leakage of lubricant caused by wear of the oil seals.

**8) RESPONSIBILITY** - CHIARAVALLI GROUP S.p.A. does not accept responsibility or pay any reimbursement for damages that occur during the use of their products, even if defective. CHIARAVALLI GROUP S.p.A. declines all responsibility in the execution of parts to a client's design under any patents.

**9) PAYMENTS** - Only payments carried out in the manner and terms agreed will be considered valid. Once the due date of payment has passed, CHIARAVALLI GROUP S.p.A. will calculate the interest on delayed payment at a rate that is 3% higher than the legal one, retaining the right to demand payment. In the event of delayed or missing payment by the purchaser, the company CHIARAVALLI GROUP S.p.A. reserves the right to suspend deliveries of the orders in course or to demand advance payment without having to pay any reimbursement or compensation to the purchaser. Any dispute regarding materials in manufacture or already possessed by the purchaser does not free the latter from the commitment of making the payment by the agreed date and for the whole amount of the invoice without making any deductions.

**10) OWNERSHIP** - All of the goods despatched remain the property of CHIARAVALLI GROUP S.p.A. until the invoice is fully paid.

**11) COMPETENT COURT** - Any controversy concerning business relations with CHIARAVALLI GROUP SpA will be dealt with under the jurisdiction of the Court of Busto Arsizio.

Chiaravalli Group S.p.A. declina qualsiasi responsabilità per eventuali errori in cui possa essere incorsa nella compilazione del presente catalogo e si riserva il diritto di apporre al disegno ed alle dimensioni dei prodotti elencati qualunque modifica richiesta da esigenze di costruzione o dallo sviluppo evolutivo del prodotto.

CHIARAVALLI GROUP SpA, do not accepts responsibility for any errors in the production of this catalogue and reserves the right to add to the drawings designs of the listed products any modification request by manufacturing requirements or due to evolution of the products.
